

Technology with Confidence

CorsisSM gives investors confidence in their critical technologies through strategic due diligence services that help you understand and protect your technology systems.

Our **Operations Assurance** and **Investment Assurance** programs help minimize the risks associated with technology investing, while maximizing the value of software assets during an acquisition or sale.

OPERATIONS ASSURANCE

Corsis helps contain the risks associated with lack of visibility into critical technologies.

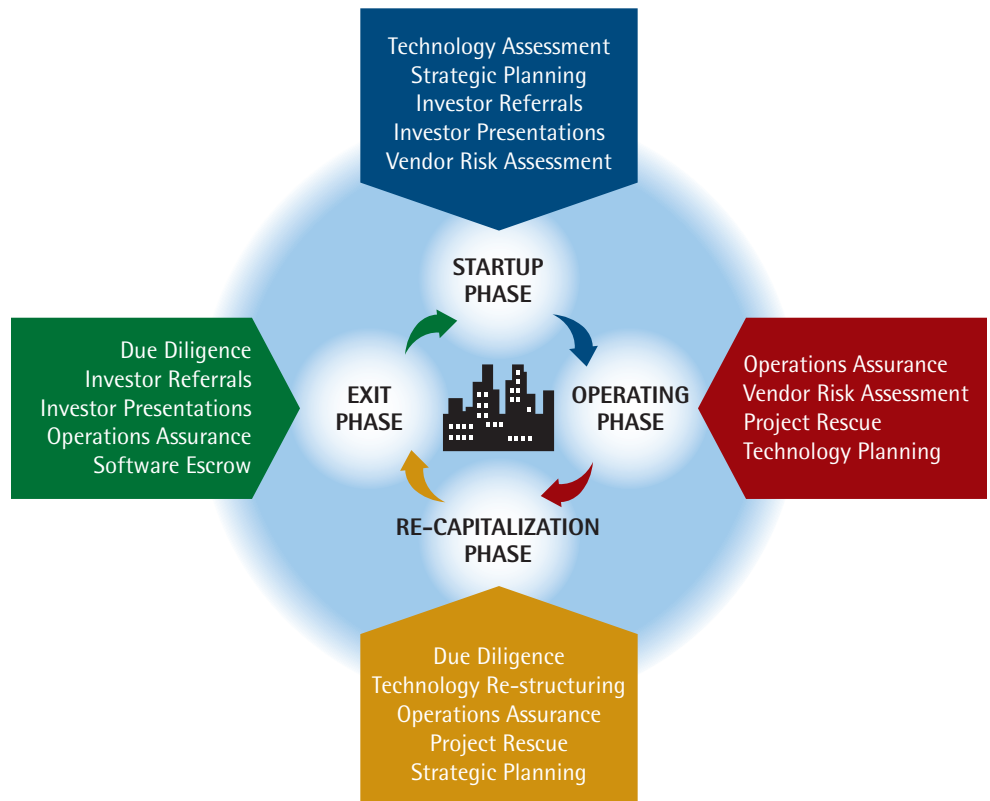

Corsis provides monitoring dashboards and backup systems to help you understand, protect and defend your company's technology assets.

INVESTMENT ASSURANCE

Corsis offers expert advisory services for media, marketing and Internet technologies, provided by our team of seasoned experts.

We support you at every stage of the technology investment lifecycle, from early startup to exit.

At every stage of growth, Corsis professional investors help mitigate both the operational and investment aspects of technology risk:
